"I thoroughly enjoyed being part of CA's STEM day. The chance to inspire young minds and encourage them to envision a future career in civil engineering was an opportunity I couldn't resist. STEM day is a great way to start building the foundation for future innovators. By fueling the flames of curiosity for the next generation of engineers, scientists, and problem solvers we can pave the way for a world where faith and knowledge come together to open the doors to limitless possibilities."

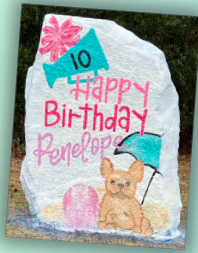

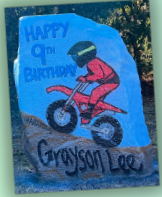

-Luis Cobos, PE, MBA
